

GREENWAY

The Greenway Trail is 7.9 miles of paved and lighted ADA accessible path featuring both jogging and bikes.

North from the Iron Bridge, sections of the Greenway Trail follow a now tree-covered roadbed once used to transport coal from the Spadra community to downtown Clarksville. Trailside meadows offer open views before the trail gently climbs and tops the levee alongside Spadra Creek. The trail continues north to the University of the Ozarks campus at the College Avenue Trailhead, passing the American Legion "castle" and crossing both Main Street and Cherry Street. From the U of O campus, the Greenway runs east to Cline Park and then to Johnson Regional Medical Center.

Heading west from the Iron Bridge, the Greenway parallels I-40 and stretches past Clarksville Public Schools to the Shady Grove Trailhead. A short detour north off the Greenway leads to the Clarksville Aquatic Center/Sports Complex featuring an indoor pool, water park, and gymnasium complete with indoor track and basketball courts.

THE SCOUT TRAIL

It's 1.3 miles of dirt trail maintained by, you guessed it, the local Boy Scout troop. The Scout Trail runs alongside Spadra Creek with the main trailhead at the Iron Bridge. Three wooden foot bridges and a picnic area are some notable features on mostly level ground before the dirt trail abruptly climbs Slate Hill to the Maple Street Trailhead.

From Maple Street, the trail travels north to the Main Street Bridge. This section of the trail was constructed as a bridle path (a path used for horseback riding) by the Civilian Conservation Corps during the 1930s. The Scout Trail offers mostly easy hiking with close views of Spadra Creek. It's off-pavement ruggedness adds a sense of rustic adventure to the trail system.

SINGLETRACKS

With a variety of wooden play park features — a small pump track, and unique hand-laid creek crossings — the Spadra Creek Singletrack system offers more than nine miles of dirt trail to off-road bikers. Four separate and unique single tracks peel off from the Lower Scout Trail, which serves as a connecting route to the singletrack system. Iron Bridge Loop, Soggy Bottom, and Eagle Loop singletracks welcome beginner to moderate skill level bikers, but the Haymaker is better suited to experienced riders. All in all, it's a solid mix of off-road pedaling. Not too easy and not too difficult, right in the sweet spot for two-wheel enthusiasts.
